

PIYUSH NANDRE

FinTech Data Analyst

📞 +91-9022357312 📍 Mumbai ✉ Email 🌐 [Linkedin](#) 🐙 [GitHub](#) 🌐 [Portfolio](#)

Summary

FinTech-focused Data Analyst skilled in Python, SQL, Apache Spark, Databricks, Power BI, and Machine Learning with hands-on experience in credit risk modeling, fraud detection, customer analytics, and financial sentiment analysis. Experienced in building ETL pipelines, dashboards, and predictive models to deliver actionable business insights.

Skills

Programming: Python, SQL, MySQL, PySpark, Pandas, NumPy, Scikit-learn

Visualization: Power BI, MS Excel

Machine Learning: Predictive Modeling, Classification, Clustering, NLP

Analytics: Data Cleaning, ETL, EDA, Feature Engineering, Customer Segmentation

Tools: Databricks, Git, GitHub

Experience

Fintech Data Analyst Intern

March 2026 – Present

8S Labs (Remote)

Excel, SQL, Power BI, ML

- Deployed risk-pattern predictive models on large transactional datasets to proactively mitigate financial fraud.
- Optimized complex SQL queries to clean and transform large transactional datasets, reducing data retrieval latency.
- Designed two interactive Power BI dashboards for cross-functional teams, reducing manual reporting time.
- Utilized statistical forecasting techniques on historical performance metrics to project quarterly transaction trends.

Projects

Credit Risk Scoring | XGBoost, Streamlit

- Built an XGBoost model optimized for imbalanced financial data to isolate high-risk credit profiles.
- Implemented automated feature engineering and integrated SHAP frameworks to provide transparent, feature-level model explainability.
- Hosted a live Streamlit web application enabling users to input data & instantly visualize risk predictions.

Banking Customer Segmentation & Financial Sentiment Analysis | Apache Spark, Databricks, Power BI

- Built an end-to-end Banking Analytics Platform using Apache Spark, Databricks, and Medallion Architecture.
- Developed PySpark ETL pipelines with FinBERT sentiment analysis and Spark ML K-Means customer segmentation.
- Designed three Power BI dashboards delivering executive KPIs, customer insights, and business recommendations.

Financial Risk & Portfolio Dashboard | Power BI

- Built a Power BI dashboard to monitor KPIs, performance trends, and analytical metrics across multiple datasets.
- Architected multi-page data models allowing stakeholders to drill down from macro trends to granular metrics.
- Processed and modeled a database of 12,000+ financial records, delivering executive-level business intelligence insights that highlighted underperforming asset trends.

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Fabric Analytics Engineer Associate
- SAP Certified - Data Analyst - SAP Analytics Cloud

Education

B.E. Computer Engineering (Honours in Data Science)

Graduated: 2026

Theem College of Engineering, Boisar
