

PIYUSH NANDRE

FinTech Data Analyst

📞 +91-9022357312 📍 Mumbai ✉ Email 🌐 [Linkedin](#) 🐙 [GitHub](#)

Summary

FinTech-focused Data Analyst skilled in Python, SQL, Power BI, and Machine Learning with hands-on experience in credit risk modeling, fraud detection, portfolio optimization, and financial forecasting. Experienced in building analytical dashboards, performing data-driven risk analysis, and extracting actionable insights.

Skills

Programming: Python, SQL, MySQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Visualization: Power BI, MS Excel

Machine Learning: Predictive Modeling, Classification, Anomaly Detection, Time Series Forecasting

Analytics: Data Cleaning, ETL, EDA, Risk Analysis, Forecasting, Feature Engineering

Tools: AWS Cloud, Git, GitHub, Streamlit

Experience

Fintech Data Analyst Intern

March 2026 – Present

8S Labs (Remote)

Excel, SQL, Power BI, ML

- Built predictive models for credit risk scoring and fraud detection using financial transaction datasets and machine learning techniques.
- Applied time series forecasting models (ARIMA) to analyze revenue trends and predict financial performance.
- Queried & analyzed 100K+ financial transactions dataset using SQL for risk analysis, fraud detection, and reporting insights.
- Developed interactive financial dashboards to visualize stock trends, risk metrics, and forecasting insights using Power BI and Streamlit.

Projects

Credit Risk Scoring | XGBoost, Streamlit

April 2026 – May 2026

- Built a credit risk scoring model using XGBoost to predict loan default probability with 99% ROC-AUC accuracy.
- Performed feature engineering, preprocessing, and SHAP-based model explainability on financial datasets.
- Developed an interactive Streamlit dashboard to visualize borrower risk profiles and prediction insights.

AI-Powered Fraud Detection | Python, ML

March 2026 – April 2026

- Built AI-driven fraud detection models using Random Forest, XGBoost, and Isolation Forest on transaction datasets.
- Improved anomaly detection through behavioral transaction analysis and risk pattern identification.
- Developed a Streamlit dashboard to visualize fraud alerts, transaction insights, and financial risk metrics.

Certifications

- Microsoft Certified: Fabric Analytics Engineer Associate
- Oracle Analytics Cloud 2025 Certified Professional

Education

B.E. Computer Engineering (Honours in Data Science)

Graduated: 2026

Theem College of Engineering, Boisar
