

PIYUSH NANDRE

FinTech Data Analyst

📞 +91-9022357312 📍 Mumbai ✉ Email 🌐 LinkedIn 📄 GitHub 🌐 Portfolio

Summary

FinTech-focused Data Analyst skilled in Python, SQL, Apache Spark, Databricks, Power BI, and Machine Learning with hands-on experience in credit risk modeling, fraud detection, customer analytics, and financial sentiment analysis. Experienced in building ETL pipelines, dashboards, and predictive models to deliver actionable business insights.

Skills

Programming: Python, SQL, MySQL, PySpark, Pandas, NumPy, Scikit-learn

Visualization: Power BI, MS Excel

Machine Learning: Predictive Modeling, Classification, Clustering, NLP

Analytics: Data Cleaning, ETL, EDA, Feature Engineering, Customer Segmentation

Tools: Databricks, Git, GitHub

Experience

AI Fintech Data Analyst Intern

March 2026 – August 2026

8S Labs

- Deployed risk-pattern predictive models on 1M+ transactional records to proactively mitigate financial fraud.
- Optimized complex SQL queries to clean and transform large transactional datasets, reducing data retrieval latency.
- Designed 5 interactive Power BI dashboards tracking key financial KPIs across cross-functional teams.
- Utilized ARIMA statistical forecasting models on historical performance metrics to project quarterly transaction trends.

Projects

Credit Risk Scoring | XGBoost, Streamlit

- Built an XGBoost model achieving 0.74 ROC-AUC on 1M+ imbalanced financial records to isolate high-risk profiles.
- Implemented automated feature engineering to create 13 custom risk features & integrated SHAP frameworks for model explainability.
- Hosted a live Streamlit web application enabling users to input data & instantly visualize risk predictions.

Crypto ESG Risk and Revenue Intelligence | Machine Learning

- Built an interactive Streamlit dashboard integrating live crypto market data, ESG analytics, volatility, and return metrics for risk monitoring.
- Developed ARIMA, ETS, LSTM, and ensemble forecasting models with holdout validation to forecast monthly revenue.
- Implemented Black-Scholes Greeks, Monte Carlo, and ESG scenario analysis for derivative & portfolio decision support.

Financial Risk & Portfolio Dashboard | Power BI

- Built a Power BI dashboard to monitor KPIs, performance trends, and analytical metrics across multiple datasets.
- Architected multi-page data models allowing stakeholders to drill down from macro trends to granular metrics.
- Processed and modeled a database of 12,000+ financial records, delivering executive-level business intelligence insights that highlighted underperforming asset trends.

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Fabric Analytics Engineer Associate
- SAP Certified - Data Analyst - SAP Analytics Cloud

Education

B.E. Computer Engineering (Honours in Data Science)

Graduated: 2026

Theem College of Engineering, Boisar
