

PIYUSH NANDRE

Data Analyst

☎ +91-9022357312 📍 Mumbai ✉ Email 🔗 [Linkedin](#) 🐙 [GitHub](#)

Summary

Data Analyst skilled in Python, SQL, Power BI, and Machine Learning with experience in data visualization, predictive analytics, KPI reporting, and dashboard development. Proficient in transforming complex datasets into actionable insights through statistical analysis, forecasting, and business intelligence solutions.

Skills

Programming: Python, SQL, MySQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Visualization: Power BI, Tableau, MS Excel

Data Science: Predictive Analytics, Classification, Anomaly Detection

Analytics: Data Cleaning, Data Transformation, EDA, KPI Analysis, Dashboard Reporting, Business Intelligence

Tools: AWS Cloud, Git, GitHub

Experience

Fintech Data Analyst Intern

March 2026 – Present

8S Labs (Remote)

Excel, SQL, Power BI, ML

- Deployed risk-pattern predictive models on large transactional datasets to proactively mitigate financial fraud.
- Optimized complex SQL queries to clean and transform large transactional datasets, reducing data retrieval latency.
- Designed 2 interactive Power BI dashboards for cross-functional teams, reducing manual reporting time by 15%.
- Utilized statistical forecasting techniques on historical performance metrics to project quarterly transaction trends.

Projects

Loan Default Prediction & Risk Analytics | XGBoost, Streamlit

- Built an XGBoost model optimized for imbalanced financial data to isolate high-risk credit profiles.
- Implemented automated feature engineering and integrated SHAP frameworks to provide transparent, feature-level model explainability.
- Hosted a live Streamlit web application enabling users to input data & instantly visualize risk predictions.

Transaction Fraud & Anomaly Detection | Python, ML

- Evaluated and deployed a multi-model ensemble to isolate outliers and detect anomalous activity.
- Identified unusual patterns through behavioral analysis and data-driven anomaly detection techniques.
- Designed an intuitive Streamlit monitoring interface to visualize localized threat clusters and operational trends.

Portfolio Performance & KPI Dashboard | Power BI

- Built a Power BI dashboard to monitor KPIs, performance trends, and analytical metrics across multiple datasets.
- Architected multi-page data models allowing stakeholders to drill down from macro trends to granular metrics.
- Processed and modeled a database of 12,000+ financial records, delivering executive-level business intelligence insights that highlighted underperforming asset trends.

Certifications

- Microsoft Certified: Fabric Analytics Engineer Associate
- Oracle Analytics Cloud 2025 Certified Professional

Education

B.E. Computer Engineering (Honours in Data Science)

Graduated: 2026

Theem College of Engineering, Boisar
